How do you go about setting a research agenda? How do you prioritize topics and figure out the correct timing, etc?

Name some of your favorite/new data sources.

Distribution of resources (incl. how the Forum can help)

Does anyone have examples of projects gone awry? How did you deal with it and what are the lessons learned?

What are some examples of successful collaborative research projects? How were they structured?

How do you effectively manage the research process (whether in-house/with a consultant)?
